

No. 6 - Dark Elves

[Exotic Species]

The Dark Elves

The Dark Elves are an **Exotic Species of Elf** that have pointy fingers, Devilish Markings around their neck, wrists, fingers, and face. They are also equipped with large scale wings with pointy spikes. They have **extremely dark skin and black eyes**. They are Elves that have broken free from **Seitei's Manipulation**, ultimately turning into a Being somewhat similar to the **Fallen Angels**. They are constantly looking for **The First Child**, they wreak havoc in doing so. Since The Fallen Angels have convinced The Dark Elves that their **Saviour** is underground, they constantly dig underground within the **Elven Kingdom**, injuring other Elves in the process. They use **Dark Magic** in battle and they only attack when something or someone is trying to interrupt their digging. Nothing much is known about them, they only make up around **0.03%** of the population on Earth.
